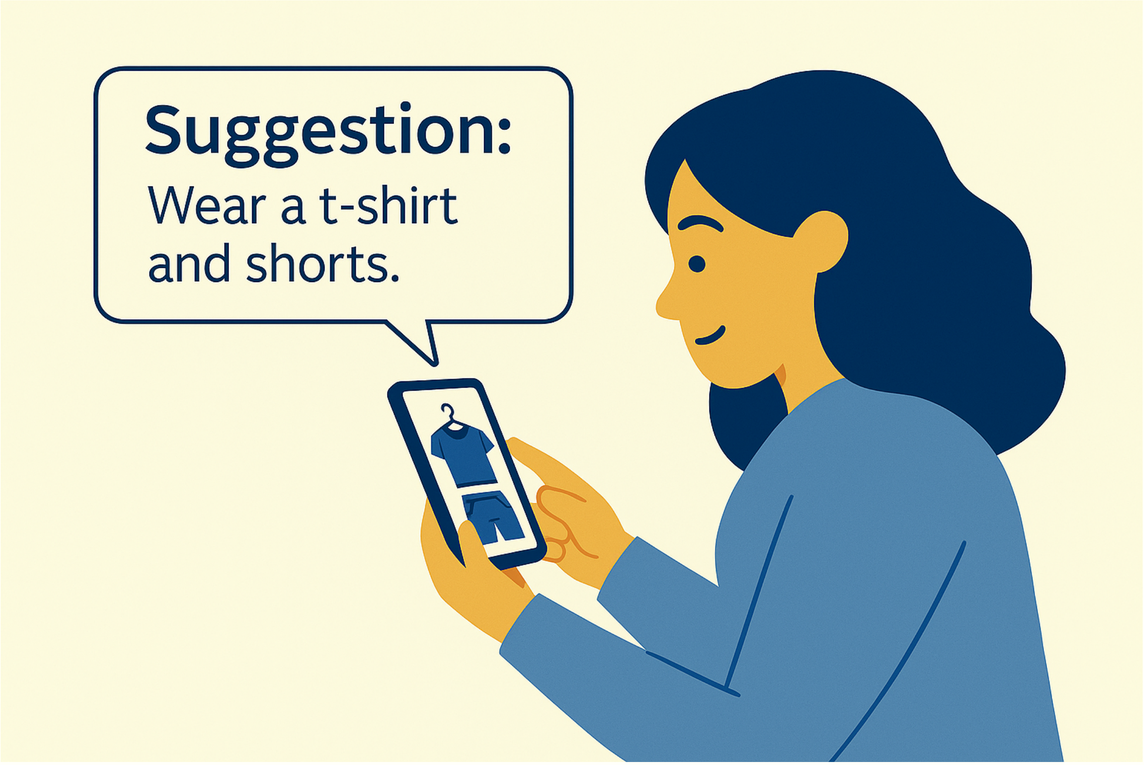
ClosetCraft

Your Wardrobe. Your Way.

Executive Summary

- **ClosetCraft** is a virtual closet app that helps users digitise, organise, and plan outfits from their existing wardrobe.
- It uses AI-powered styling suggestions based on weather, events, and personal style preferences.
- Targets students, young professionals, and fashion-forward individuals aged 16–30.
- Combines a freemium model with affiliate fashion links and potential resale partnerships.
- Aims to reduce decision fatigue and promote sustainable fashion consumption.

Business Concept & Vision



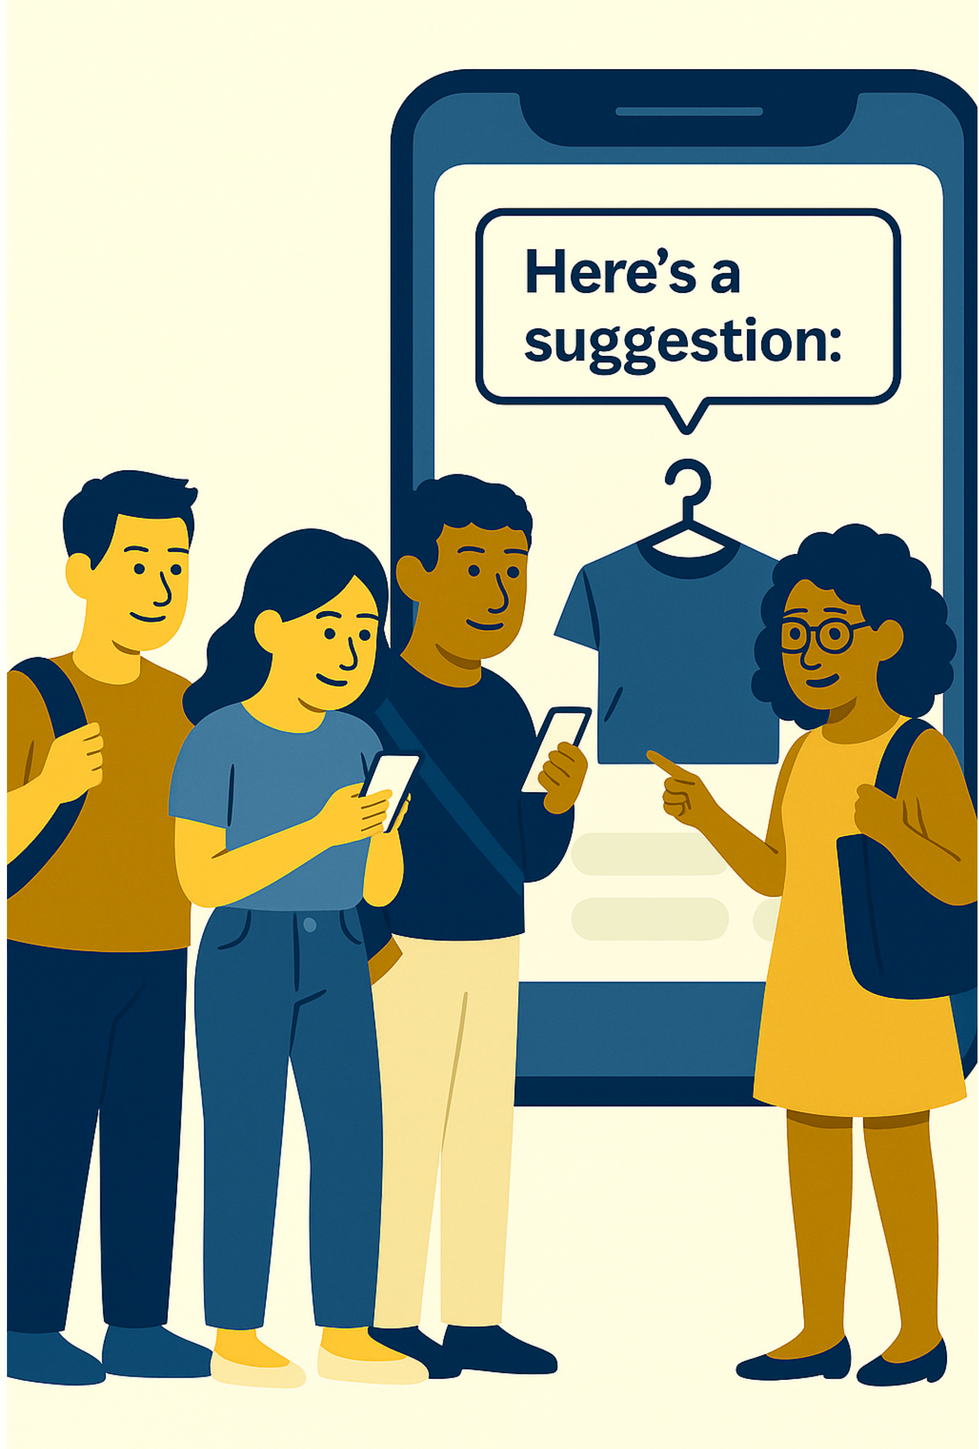
- **ClosetCraft** is a mobile app that transforms how people manage their wardrobes.
- Users can **upload, categorise, and access** their wardrobe digitally from anywhere.
- The app offers **AI-powered outfit suggestions** based on weather, events, and style.
- ClosetCraft supports **conscious consumption** by reducing unnecessary shopping and promoting wardrobe reuse.

Market Opportunity

- The global **fashion-tech market** is projected to surpass **$260 billion by 2025**, driven by AI, digital wardrobes, and personalization.
- Digital wardrobe apps help reduce overconsumption and align with the growing demand for **sustainable fashion**.
- The secondhand apparel market is expected to **double in size by 2027**, offering ClosetCraft a future opportunity to integrate resale tools.
- Smartphone penetration and mobile-first shopping behavior make app-based fashion assistants highly scalable.

Target Audience

- **Primary audience**: Students and young professionals (aged 18–30) who face daily outfit decisions.
- **Tech-savvy users** who are active on social media and use productivity or lifestyle apps.
- **Fashion-conscious individuals** who care about looking good without spending hours deciding what to wear.
- **Geographic focus:** Urban regions with strong smartphone penetration and fashion culture.



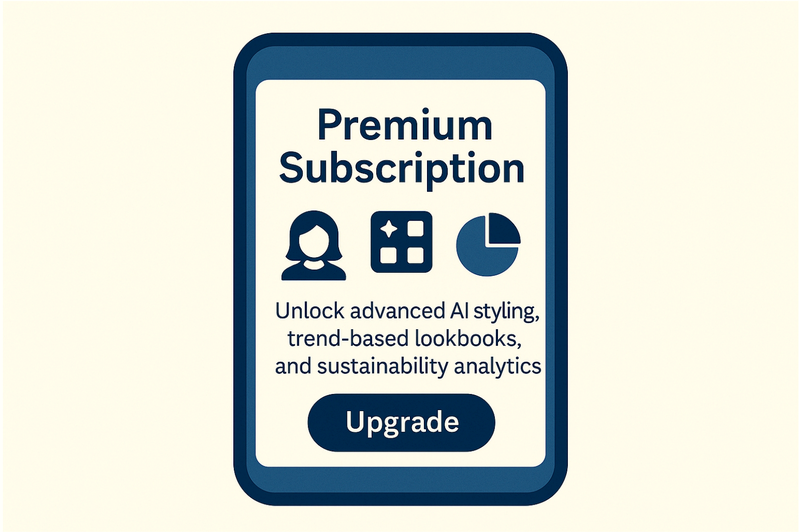
Competitive Landscape

- **ClosetCraft** differentiates itself from existing wardrobe apps by combining:
  - AI-powered outfit suggestions
  - Clean and intuitive UX
  - Future integration of resale and sustainability features
- **Key Competitors:**
  - **Whering** – Focused on digital wardrobe & planning; lacks AI personalization
  - **Smart Closet** – Offers manual outfit planning; outdated interface

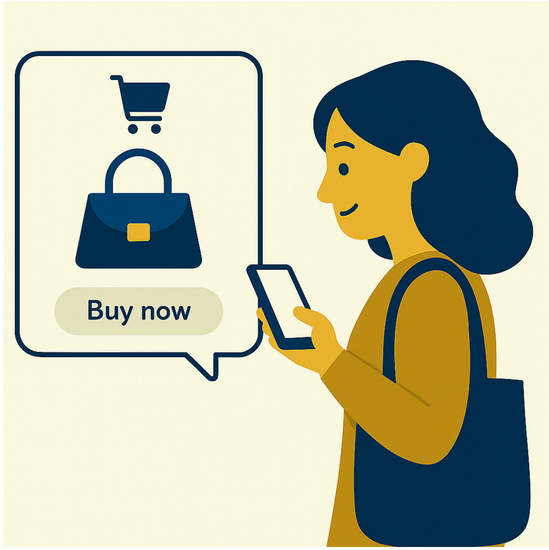
Marketing Strategy

- **Social Media Campaigns**: Use Instagram, TikTok, and Pinterest to showcase outfit planning features with micro-influencers.
- **Influencer Collaborations**: Work with fashion bloggers to create reels showing daily outfit suggestions using ClosetCraft.
- **App Store Optimization (ASO)**: Target keywords like “outfit planner,” “digital closet,” and “AI styling” to boost discoverability.
- **Referral Program**: Users earn rewards or premium features by inviting friends to download and use the app..

Sales Plan



- **Premium Subscription**: Unlock advanced AI styling, trend-based suggestions, and sustainability analytics for a monthly fee.
- **Freemium Model**: Users can access core features for free (uploading clothes, tagging, outfit suggestions).

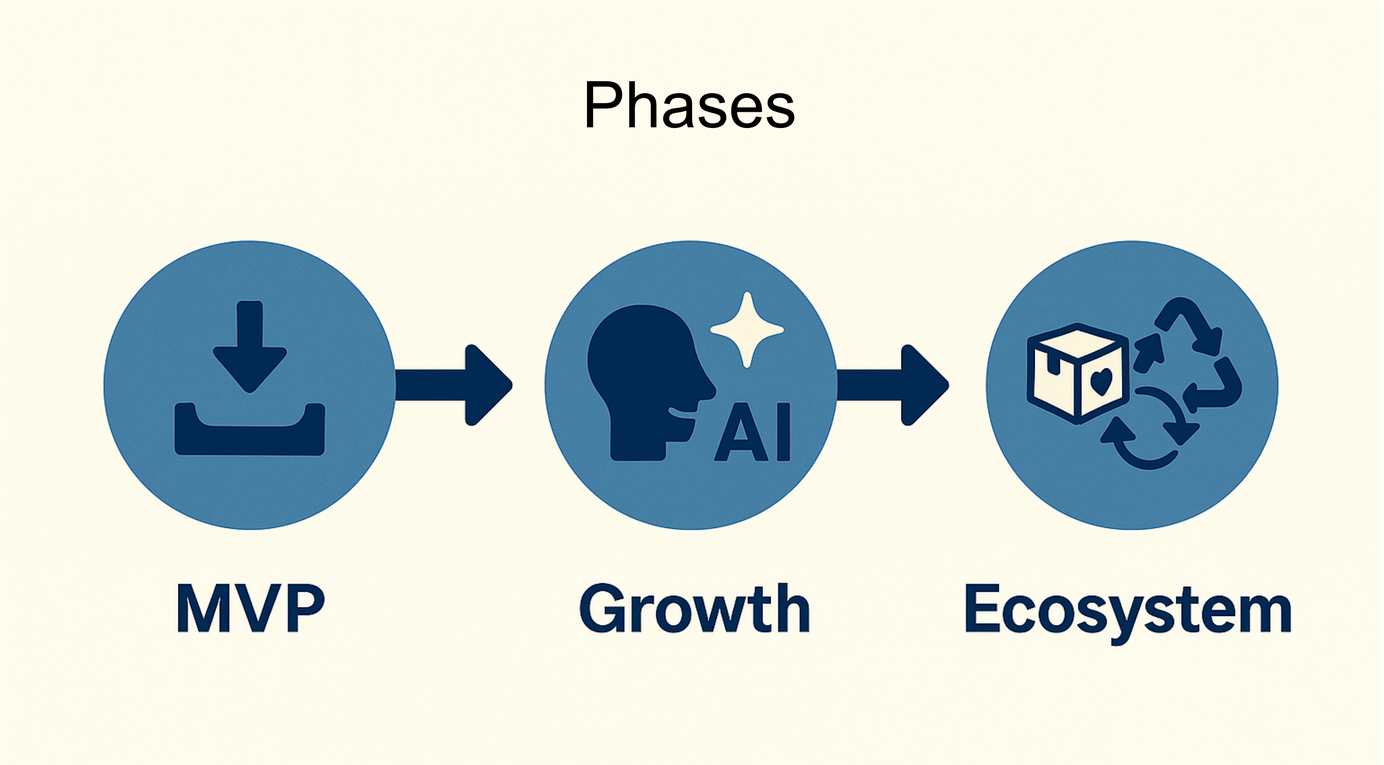


- **Affiliate Revenue:** Earn commission from partner fashion brands when users purchase items through suggested links.

- **Brand Partnerships**: Collaborate with eco-conscious clothing brands for in-app promotions and curated style collections.

Operations Overview

- **Phase 1: MVP Launch**
  - Upload, tag, and organize clothes
  - AI outfit suggestions
  - Basic user profile setup
- **Phase 2: Feature Expansion**
  - Style diary and favourite outfits
  - Weather-based outfit recommendations
  - Improved tagging and image recognition
- **Phase 3: Ecosystem Growth**
  - Resale/donation integration
  - Sustainability tracker
  - Partner brand store pages



- **Tech Stack (Expected):** React (web app), spring-boot (backend), Python (AI framework), Figma (UI)
- **Team Roles:** Design, Dev, Data, Content, Support all managed remotely via tools like Notion, GitHub, and Slack

Management Team

- – Product Manager & Frontend Lead
  - Leads product strategy, manages project execution, and develops the frontend for the application.
- - Backend & Data Lead
  - Develops REST APIs, Manages the Databases, Supports future AI integration and cloud deployment
- - Design & UX Lead
  - Ensures consistent and clean visual design, Defines UI branding, Creates user flows and mockups
- - Marketing & Partnerships Lead
  - Crafts social media strategies and outreach ideas, Manages potential collaborations with student groups & brands, Designs referral program and brand presence

Financial Highlights

- **Expected Initial costs**
  - App Development (Year 1): € 500 - €1,000
  - Design & Branding: €300 - €800
  - Cloud Hosting: €500
  - Marketing & Ads: €2,000
  - Miscellaneous: €200
  - **Total Estimated Cost: €3,500 - €4,500**
- **Revenue Sources:**
  - Premium Subscription: €4.99/month
  - Affiliate Links: €0.50–€1 per sale
  - Brand Partnerships: €300–€500/partner

Risk & Mitigation

- **Market Adoption Risk:**
  - **Risk:** Users may not adopt the app if the learning curve or value isn’t clear.
  - **Mitigation:** Build a simple, intuitive UI + onboarding tutorial to guide new users.
- **Competition Risk:**
  - **Risk:** Well-funded competitors could enter or scale faster.
  - **Mitigation:** Focus on niche positioning (AI, sustainability) and student-first features.
- **Privacy & Data Security:**
  - **Risk:** Users uploading wardrobe photos may have privacy concerns.
  - **Mitigation:** Use secure cloud storage and communicate clear data policies.

Funding Needs & Use of Funds

- **Total Funding Required: €3,500 – €4,500 (Initial Phase)**
- **How Funds Will Be Used:**
  - **App Development** – €500 - €1,000 (Frontend, backend, database, basic AI styling logic)
  - **Design & Branding** – €300 - €800 (App UI/UX, logo, visual identity)
  - **Marketing & Outreach** - €2,000 (Influencer campaigns, social media ads, campus events)
  - **Cloud Infrastructure** – €500 (Hosting, file storage, basic analytics)
  - **Contingency & Tools** – €200–€500 (Miscellaneous tools, testing platforms, domain registration)

Conclusion / Key Ask

- **ClosetCraft** is a concept for a smart, stylish, and sustainable digital wardrobe assistant.
- This business plan outlines how the app could address common wardrobe problems for tech-savvy and young professionals.
- We've proposed a freemium-based model supported by styling features, brand partnerships, and resale opportunities.
- **Our goal** is to present a feasible, well-researched digital startup idea that promotes sustainability and everyday convenience.
- **Key Ask:**
  - Constructive feedback on our idea
